

## INTERGRAPH®

Intergraph® is the leading global provider of engineering and geospatial software that enables customers to visualize complex data. Businesses and governments in more than 60 countries rely on Intergraph's industry-specific software to organize vast amounts of data and infuse the world with intelligence to make processes and infrastructure better, safer and smarter. The company's software and services empower customers to build and operate more efficient plants and ships, create intelligent maps, and protect critical infrastructure and millions of people around the world.

Intergraph operates through two divisions: **Process, Power & Marine (PP&M)** and **Security, Government & Infrastructure (SG&I)**. Intergraph PP&M provides enterprise engineering software for the design, construction, and operation of plants, ships, and offshore facilities. Intergraph SG&I provides geospatially powered solutions to the public safety and security, defense and intelligence, government, transportation, photography, utilities and communications industries. Intergraph SG&I serves its U.S. federal and classified business through **Intergraph Government Solutions (IGS)**, an independent, wholly owned subsidiary.

Intergraph is a wholly-owned subsidiary of Hexagon AB (Nordic exchange: HEXA B), (Swiss exchange: HEXN). [www.hexagon.se](http://www.hexagon.se)

## INTERGRAPH FACTS

- HEADQUARTERS: Huntsville, Ala.
- FOUNDED: 1969
- EMPLOYEES: More than 4,000 worldwide
- COUNTRIES WITH OFFICES: 34
- PATENTS: More than 300
- R&D INVESTMENT: More than US\$500 million in last five years

## LEADERSHIP

- Ola Rollén, President and Chief Executive Officer, Hexagon AB, and Chief Executive Officer, Intergraph
- Gerhard Sallinger, President, Intergraph Corporation Process, Power & Marine
- John Graham, President, Intergraph Corporation Security, Government & Infrastructure
- Steven Cost, Chief Financial Officer, Intergraph Corporation
- Ed Porter, Executive Vice President, Human Resources, Intergraph Corporation

## PROCESS, POWER & MARINE

Intergraph PP&M is the leading global provider of enterprise engineering software to the process, power, and marine industries.

Intergraph engineering solutions increase productivity and accelerate projects by providing the full design, construction, materials, and engineering data management capabilities needed for the creation, safe operation and maintenance, and capital Project Life Cycle Management (cPLM) of large-scale process, power, marine, and offshore projects.

The ARC Advisory Group, a leading industry analyst firm, ranked Intergraph the No. 1 overall engineering design 3D software and process engineering tools (PET) provider worldwide according to its *PET Worldwide Outlook Market Analysis and Forecast through 2013*.

Intergraph PP&M serves the following business sectors:

**Process & Power:** As the global leader in the plant creation market, more than two-thirds of plants built worldwide are designed with Intergraph enterprise engineering software, including many of the world's largest and most advanced industrial facilities.

Intergraph's suite of intelligent data-centric and rules-based solutions enables users to share data globally, build safety into plants early in the design process, efficiently construct plants, and manage the engineering design basis throughout the life cycle of an asset.

**Marine:** The company's solutions for shipbuilding enable more efficient designs and improve productivity throughout the life of the vessel or platform. Intergraph's marine customers include the world's leading shipbuilders and offshore providers.

Intergraph marine enterprise engineering software streamlines marine outfitting and structure design processes and provides all the functionality needed to design and build many different types of marine facilities, including commercial and navy ships, offshore platforms and floating production, storage and offloading (FPSO), and liquid natural gas (LNG) vessels.

## SECURITY, GOVERNMENT & INFRASTRUCTURE

Intergraph SG&I enables governments and businesses to protect people, high-value assets, and infrastructure, as well as manage and analyze incidents.

Intergraph geospatial software integrates, georeferences, and analyzes large volumes of data from multiple sources to create, display, and distribute actionable information.

Intergraph SG&I serves a variety of strategic industries and sectors:

**Defense & Intelligence:** Agencies worldwide use Intergraph open-standards geospatial security software, as well as motion video exploitation, geospatial intelligence exploitation, and geospatial intelligence production solutions to improve analysis and deliver actionable intelligence to facilitate situational awareness and mission success.

**Government:** Intergraph enables governments and businesses to better analyze, design, manage, and operate the world's land, resources, and infrastructure.

Intergraph government and spatial data infrastructure (SDI) solutions integrate geospatial data across functions, departments, and organizations to enable quick, accurate information sharing, analysis, and decision-making for increased productivity, ease of maintenance, and administration.

**Photogrammetry:** Intergraph provides the commercial remote sensing and photogrammetry industry's most comprehensive workflow for capturing, producing, and distributing geospatial data from a single vendor.

**Public Safety & Security:** Intergraph is the leading provider of public safety and security software trusted by governments and business to protect one in 12 people and critical infrastructure worldwide.

Its scalable software transforms data into actionable information to promote interoperability for efficient response, reporting, analysis, and resource management to reduce crime, protect property, and save lives.

**Transportation:** Intergraph offers a comprehensive range of interoperable, geospatially powered software to manage and secure transportation infrastructure and data.

Its transportation software creates maps and infrastructure asset databases to enable road, rail and transit agencies, airports, and seaports to efficiently and cost-effectively secure, manage, and maintain their transportation networks and facilities.

**Utilities & Communications:** Intergraph software enables utilities and communications networks to geospatially manage, operate, and secure network infrastructure and data.

Its comprehensive, geospatial infrastructure, smart grid, outage, mobile workforce, and field force management solutions ensure the efficient operation of distribution networks.

**U.S. Federal & Classified:** Intergraph has long served the U.S. and other governments around the world. Now, as an independent subsidiary following Hexagon AB's acquisition of Intergraph, Intergraph Government Solutions (IGS) continues to serve Intergraph's U.S. federal and classified business through its Defense and Intelligence, Federal Solutions, and Intergraph Service Corporation units. SG&I will continue to provide Intergraph defense and intelligence solutions internationally.
