

## INTERGRAPH® PROCESS, POWER & MARINE EDUCATION PROGRAM

### FOSTERING TOMORROW'S LEADERS

Recognizing the increasing importance of a close partnership between academia and developers of leading technology, Intergraph® Process, Power & Marine offers robust academic programs for higher education. Intergraph's Education Program, which donates thousands of dollars in software and services to universities worldwide, advances innovative teaching and recognizes academic excellence.

Intergraph helps prepare students to enter the professional world while facilitating relationships between academia and industry in developing ideas and finding innovative solutions to industry challenges. Through the application of leading-edge technology, professors and students can explore new possibilities within their chosen field of study.

The Intergraph Education Grant Program prepares educators and launches students fully equipped into the process, power, and marine industries. It is designed to introduce and stimulate the use of Intergraph's life cycle engineering software at education institutions with strong engineering programs. Early access to leading technology ensures that students are better educated and highly qualified to become future leaders within the plant and shipbuilding industries.

Join educational institutions from around the world already taking advantage of Intergraph products. Program details and application forms are available at [www.intergraph.com/ppm/education](http://www.intergraph.com/ppm/education).

### ABOUT INTERGRAPH

Intergraph is the leading global provider of engineering and geospatial software that enables customers to visualize complex data. Businesses and governments in more than 60 countries rely on Intergraph's industry-specific software to organize vast amounts of data to make processes and infrastructure better, safer and smarter. The company's software and services empower customers to build and operate more efficient plants and ships, create intelligent maps, and protect critical infrastructure and millions of people around the world.

Intergraph operates through two divisions: Process, Power & Marine (PP&M) and Security, Government & Infrastructure (SG&I). Intergraph PP&M provides enterprise engineering software for the design, construction, operation and data management of plants, ships and offshore facilities. Intergraph SG&I provides geospatially powered solutions,

including ERDAS technologies, to the public safety and security, defense and intelligence, government, transportation, photogrammetry, and utilities and communications industries. Intergraph Government Solutions (IGS) is a wholly owned subsidiary of Intergraph Corporation responsible for the SG&I U.S. federal business.

Intergraph is part of Hexagon (Nordic exchange: HEXA B; [www.hexagon.com](http://www.hexagon.com)), a leading global provider of design, measurement, and visualization technologies that enable customers to design, measure and position objects, and process and present data.
