

SMARTPLANT® SAFETY SOLUTIONS: SMARTPLANT ACTION MANAGEMENT

ENHANCE PRODUCTIVITY, QUALITY, AND CONSISTENCY BY TRACKING ACTIONS AND COMPLETIONS

A HAZOP or engineering integrity check can yield hundreds of actions from several disciplines. These actions must be effectively managed. Some of these actions have dependencies, so that makes the action management process even more complex.

SmartPlant Action Management transmits the required actions produced by the HAZOP and engineering checks to the appropriate disciplines. The software tracks the actions process and completions.

The solution helps ensure on-time, high-quality delivery. You can also check before you release the P&ID or perform another check or HAZOP to ensure that all corrections have been completed, and if not, determine who needs to complete the actions.

Actions to make design modifications are assigned and managed for follow-up and approvals to ensure that the final design meets your safety standards and engineering practices. You can

manage design activities across disciplines. SmartPlant Action Management helps you check design against safety and engineering practices early in the design and during all the design phases, reducing the risk of late and costly changes.

Streamline the action management process. After reported issues have been actioned, users can rerun SmartPlant Action Management and produce a comparison report that outlines all eliminated issues and highlights new issues that may have been introduced by the action.

PART OF THE SMARTPLANT SAFETY SOLUTIONS

SmartPlant Action Management is a member of the Intergraph SmartPlant Safety Solutions. Purchase the products which fit your workflow – each is available separately:

- SmartPlant Process Safety
- SmartPlant P&ID Engineering Integrity
- SmartPlant Action Management

ABOUT INTERGRAPH

Intergraph is the leading global provider of engineering and geospatial software that enables customers to visualize complex data. Businesses and governments in more than 60 countries rely on Intergraph's industry-specific software to organize vast amounts of data to make processes and infrastructure better, safer and smarter. The company's software and services empower customers to build and operate more efficient plants and ships, create intelligent maps, and protect critical infrastructure and millions of people around the world.

Intergraph operates through two divisions: Process, Power & Marine (PP&M) and Security, Government & Infrastructure (SG&I). Intergraph PP&M provides enterprise engineering software for the design, construction, operation and data management of plants, ships and offshore facilities. Intergraph SG&I

provides geospatially powered solutions, including ERDAS technologies, to the public safety and security, defense and intelligence, government, transportation, photogrammetry, and utilities and communications industries. Intergraph Government Solutions (IGS) is a wholly owned subsidiary of Intergraph Corporation responsible for the SG&I U.S. federal business.

Intergraph is part of Hexagon (Nordic exchange: HEXA B; www.hexagon.com), a leading global provider of design, measurement, and visualization technologies that enable customers to design, measure and position objects, and process and present data.
