

Intergraph Belgium Staff Awarded FME® Accreditation from Safe Software

Brussels, - 1 July, 2014 - It is with great pride that Intergraph Belgium announces Jelle De Zwaef, one of the GIS specialists, was awarded the FME® Certified Professional accreditation, in recognition of his in depth expertise and product knowledge.

Designed for consultants and integrators, the Certified FME® Professional accreditation identifies individuals with a proven ability to provide knowledgeable FME® support and consulting services.

Obtaining Safe Software's FME® Certified Professional accreditation demonstrates Intergraph's commitment to continuous improvement and striving for the highest standard of services and technology.

About Safe Software and FME

Safe Software is the maker of FME and the pioneering global leader in spatial data transformation technology. FME empowers users to confidently transform spatial data so it can be used and shared - where, when and how it's needed. Available in seven languages, FME's unmatched transformation capabilities and support for 325+ spatial and non-spatial formats enables you to quickly overcome data challenges so you can focus on your objectives. Discover why leading vendors and thousands of organizations worldwide rely on FME to quickly overcome barriers to using and sharing data. Visit www.safe.com.
