## **Intergraph<sup>®</sup>, everis and Sadiel develop the transformation of 112 Emergency Service in Andalusia, Spain**

**The project will modernize the management of emergency services in public safety and  
civil protection**

**HUNTSVILLE, Ala., February 28, 2012** – The Ministry of Interior and Justice of the Junta de Andalucía, Spain, has awarded – on the basis of a Europe-wide public tender – the joint venture formed by Intergraph<sup>®</sup>, everis and Sadiel to realize a complete transformation of the operating system of the 112 Emergency service in Andalusia, Spain. This project covers from the definition of Integrated Management of the Emergency Model to the design, development, implementation and maintenance of the technological support platform.

Intergraph, everis and Sadiel will be responsible for implementing the latest technology in supporting emergency systems, providing intelligent support to decision-making processes to generate an automated management map for the Andalusia region, ensuring security, traceability and availability of information. This important project will allow as well to share the emergency model with other autonomous communities in Spain and internationally.

“Intergraph is proud to partner with everis and Sadiel to provide advanced emergency management technology to Andalusia,” said John K. Graham, President, Intergraph Security, Government & Infrastructure. “The new platform will enable faster, smarter decisions to protect people and property throughout the region.”

Intergraph is the leading global provider of public safety emergency incident response, reporting, analysis, and records management solutions. Intergraph public safety and security solutions protect one in 12 people in the world.

###

**About Intergraph**

Intergraph is the leading global provider of engineering and geospatial software that enables customers to visualize complex data. Businesses and governments in more than 60 countries rely on Intergraph's industry-specific software to organize vast amounts of data to make processes and infrastructure better, safer and smarter. The company's software and services empower customers to build and operate more efficient plants and ships, create intelligent maps, and protect critical infrastructure and millions of people around the world.

Intergraph operates through two divisions: Process, Power & Marine (PP&M) and Security, Government & Infrastructure (SG&I). Intergraph PP&M provides enterprise engineering software for the design, construction, operation and data management of plants, ships and offshore facilities. Intergraph SG&I provides geospatially powered solutions including ERDAS technologies to the public safety and security, defense and intelligence, government, transportation, photogrammetry, and utilities and communications industries. Intergraph Government Solutions (IGS) is an independent subsidiary for SG&I's U.S. federal and classified business.

Intergraph is a wholly owned subsidiary of Hexagon AB, (Nordic exchange: HEXA B) and (Swiss exchange: HEXN). For more information, visit [www.intergraph.com](http://www.intergraph.com) and [www.hexagon.com](http://www.hexagon.com).
