

G/Technology Oracle & Administration

COURSE OVERVIEW

This is a two-day Oracle training class tailored specifically for G/Technology. This class is for internal staff and customers who need to know how to manage their Oracle database.

DURATION

This is a 2-day workshop either on-site or at the Intergraph Training Centre. This course would typically be followed by a 3-day G/Tech Administration for System Administrators course building on the foundations learnt within this Oracle Database foundation course.

PRE-REQUISITES:

Familiarity with a Windows Operating System is required.

COURSE TOPICS

- Installing Oracle
- Oracle parameters needed for G/Technology
- Required patches
- Creating databases, instances, users, tablespace and roles
- Familiarity with the Oracle Data Dictionary
- Import/Export of data
- SQL commands
- Joins
- Views

UK SECURITY GOVERNMENT & INFRASTRUCTURE TRAINING SERVICES

- Intergraph SG&I in the UK is able to offer training services in its dedicated Swindon Training Centre or on customer sites. Courses address the requirements of technicians, designers, engineers, supervisors and managers who need to use any of our products.
- In addition to the regular scheduled courses, we are able to tailor training to reflect individual requirements for product operation, updates, customisation or administration. Our high-technology training centre provides a first-class environment for structured training with highly experienced tutors. Students are provided with comprehensive documentation for future reference and guidance.
- Link: <http://www.intergraph.com/global/uk/cgi/training/default.aspx>

COURSE FORMAT

Each topic is covered by means of lecture and demonstration based on the G/Technology Pack documentation. The attendees will perform each step themselves to gain hands on experience, thereby reinforcing what they have learnt. During the working sessions the tutor is available to answer question and give one to one assistance if required.

Attendees are encouraged to ask questions and to experiment in order to derive full benefit from the training course.

ABOUT INTERGRAPH

Intergraph is the leading global provider of engineering and geospatial software that enables customers to visualise complex data. Businesses and governments in more than 60 countries rely on Intergraph's industry-specific software to organise vast amounts of data into understandable visual representations and actionable intelligence. Intergraph's software and services empower customers to build and operate more efficient plants and ships, create intelligent maps and protect critical infrastructure and millions of people around the world.

Intergraph operates through two divisions: Process, Power & Marine (PP&M) and Security, Government & Infrastructure (SG&I). Intergraph

PP&M provides enterprise engineering software for the design, construction and operation of plants, ships and offshore facilities. Intergraph SG&I provides geospatially-powered solutions to the defence and intelligence, public safety and security, government, transportation, photogrammetry, utilities and communications industries.
